MILAM enterprise was originally founded as a medium-sized engineering company. Our experience, technique and Know-How has been built and developed through decades of exacting engineering by partners worldwide. For almost 30 years MILAM manufactures in single-part production, stainless-steel plants, special machinery and equipment for the beverage- and food- industry, as well as for the chemical-pharmaceutical- and cosmetical industry, regarding individual customer requirements. Our products are subject for Customers which are interested in producing of equipment somewhere closer to it clients. We are very flexible manufacturer and able to satisfy individual customer demands in consulting, planning, engineering, construction. designing, production, automation, delivery, installation, assembly, commissioning and of course in After-Sales Services. Our Quality Management follows the standards of DIN EN ISO 9001:2000. We are a Certified Company like: TÜV AD 2000 HP 0, TÜV Welding specialist DIN EN 729-3, TÜV WHG § 19 I, TÜV AD-2000 HP 0 Ziff.4, § 15 StrISchV,...and other manifold procedure examinations.

Our goal is to offer perfect products to all our customers. That's why it is necessary to utilize correspondingly modern technologies for production. This standard of production is yielded by well-trained and highly motivated employees in combination with the most modern machinery. To ensure continuously high quality for our customers, our company pursues the philosophy of a high vertical integration in production. Due to our philosophy to excel in stainless steel, we process this material solely. This requires very special equipment for the materials' mechanical treatment as well as the expertise to know how to process stainless steel properly. To the greatest extent feasible, we employ computer-controlled machines. This computer assistance results in an increased precision and in minimized errors during production. All parts and products are treated in a special pickling solution prior to leaving our Company.
